

---

Some pretty decent new games have been coming out for the PS3, Xbox 360, and PC lately. One of the games that is really getting a lot of attention is The Last Of Us on the PS3 and PC which just came out in June and had a free trial version and then got rid of it. If you're wondering why we missed 2013 with that title last year, it's because this game was originally released in 2013 for the PS3. This game has been called "The Citizen Kane of Video Games" by its creator so it's sure to be something special if you go ahead and purchase it. Here are some pros and cons that you should know about, to help you make an informed decision on whether or not this game is worth picking up. PROS: -This game has some of the best graphics on the market today which is evident from the first time you see someone die. The detail in some of the facial expressions are so realistic that you feel bad when something happens to some of the characters. One guy told me that he didn't even notice what was happening because he was so focused on the details. The graphics are especially good when it's raining outside or there is a storm coming in, almost makes it seem like it's really raining outside. -People who say that the story was weak and you're not going to be hooked on the story like they were, I would argue that it's because they didn't pay much attention. The story is told through a journal and everything that happens is explained. If you want to know what happened to your character in the beginning, just flip through the journal and you'll find out what's going on. -The violence level of this game is pretty realistic if you ask me, since there are blood stains all over the walls after someone dies so realistically we're getting a sense of how these things would look like in real life. Most of the enemies you encounter are very hostile and will attack you without hesitation. -The character development is excellent in this game, like I said before, it's almost like playing a mini movie. Make sure to play the story all the way through if you're considering purchasing this game because it doesn't end with a cliffhanger and there's a lot of drama and action to keep it exciting throughout the entire game. -Some of this game's gameplay elements are pretty unique such as using your enemies as weapons or traps or hiding from other enemies while your friends pass by unnoticed. I guess you could also say this game is innovative because you can upgrade your character's weapons to make them better. -The game controls are pretty simple and easy to pick up on. There are no commands or controls that might confuse you while playing, which is great since the game is already very long. -This game has different endings depending on which faction you're on at the end of the story, so there's definitely something for everyone here.
